## 📁 PROJECTS

### Real time chat application

Created a real time chat application using React Js, Node Js, MongoDB, Socket.io,JWT.

### Whatsapp Automation

By using pywhatkit module in python. I have created this project. In order to help those peoples who are busy and can send messages to their friends, relatives on particular time they want to send.

### Voice assistant

This project is based on python. By using pyttsx3 is a text-to-speech conversion library in Python I created this voice assistant. It is like online friend.

### Fruit Shop Website

A fruit shop website using Html, CSS and Javascript. This website has many features where you can purchase fruits of your choice according to the season.

### Spam Mail Prediction

With the help of Logistic Regression which is a part of Machine Learning I have made a project which help users to predict that the message which they have received is spam or ham mail.
